Continued practice by an individual after the suspension of the individual's certificate or license under this division shall be considered practicing without a certificate or license. The board shall notify the suspended individual of the suspension of the individual's certificate or license under this division by certified mail or in person in accordance with section 119.07 of the Revised Code. If an individual whose certificate or license is suspended under this division fails to make a timely request for an adjudicatory hearing, the board shall enter a final order revoking the individual's certificate or license.

- (G) If the supervisory investigative panel determines both of the following, the panel may recommend that the board suspend an individual's certificate or license without a prior hearing:

- (1) That there is clear and convincing evidence that an individual has violated division (A) of this section;

A telephone conference call may be utilized for reviewing the allegations and taking the vote on the summary suspension. The board shall issue a written order of suspension by certified mail or in person in accordance with section 119.07 of the Revised Code. The order shall not be subject to suspension by the court during pendency or any appeal filed under section 119.12 of the Revised Code. If the individual subject to the summary suspension requests an adjudicatory hearing

by the board, the date set for the hearing shall be within fifteen days, but not earlier than seven days, after the individual requests the hearing, unless otherwise agreed to by both the board and the individual.

Any summary suspension imposed under this division shall remain in effect, unless reversed on appeal, until a final adjudicative order issued by the board pursuant to this section and Chapter 119. of the Revised Code becomes effective. The board shall issue its final adjudicative order within seventy-five days after completion of its hearing. A failure to issue the order within seventy-five days shall result in dissolution of the summary suspension order but shall not invalidate any subsequent, final adjudicative order.

- (H) Sanctions shall not be imposed under division (A)(13) of this section against any certificate or license holder who waives deductibles and copayments as follows:
- (1) In compliance with the health benefit plan that expressly allows such a practice. Waiver of the deductibles or copayments shall be made only with the full knowledge and consent of the plan purchaser, payer, and third-party administrator. Documentation of the consent shall be made available to the board upon request.
 - (2) For professional services rendered to any other person who holds a certificate or license issued pursuant to this chapter to the extent allowed by this chapter and the rules of the board.
- (I) In no event shall the board consider or raise during a hearing required by Chapter 119. of the Revised Code the circumstances of, or the fact that the board has received, one or more complaints about a person unless the one or more complaints are the subject of the hearing or resulted in the board taking an action authorized by this section against the person on a prior occasion.
- (J) The board may share any information it receives pursuant to an investigation under division (D) of section 4715.03 of the Revised Code, including patient records and patient record information, with law enforcement agencies, other licensing boards, and other governmental agencies that are prosecuting, adjudicating, or investigating alleged violations of statutes or administrative rules. An agency or board that receives the information shall comply with the same requirements regarding confidentiality as those with which the state dental board must comply, notwithstanding any conflicting provision of the Revised Code or procedure of the agency or board that applies when it is dealing with other information in its possession. In a judicial proceeding, the information may be admitted into evidence only in accordance with the Rules of Evidence, but the court shall require that appropriate measures are taken to ensure that confidentiality is maintained with respect to any part of the information that contains names or other identifying information about patients or complainants whose confidentiality was protected by the state dental board when the information was in the board's possession. Measures to ensure confidentiality that may be taken by the court include sealing its records or deleting specific information from its records.

- (G) Require a dentist or dental hygienist who resumes practice after completion of treatment to comply with an aftercare contract that meets the requirements of rules adopted by the board for approval of treatment providers;
- (H) Report to the board any dentist or dental hygienist who suffers a relapse at any time during or following aftercare.

Any dentist or dental hygienist who enters into treatment by an approved treatment provider shall be deemed to have waived any confidentiality requirements that would otherwise prevent the treatment provider from making reports required under this section.

(B) Anesthesia/sedation terms

- (1) "Administration" - providing, applying, or injecting a drug or other therapeutic agent for a patient of record, including providing a patient with a single dose of a controlled substance or other dangerous drug that is to be used incidental to, or contemporaneously with, a planned procedure, with the intent of being an integral and indicated action to properly initiate and complete the dental procedure within the standard of care in dentistry.
- (2) "Analgesia" - the diminution or elimination of pain.
- (3) "Anxiolysis" - the diminution or elimination of anxiety.
- (4) "Enteral/oral conscious sedation" - The use of a single drug administered orally or sublingually at one time on a given treatment day, or combination of drugs administered concomitantly orally or sublingually at one time on a given treatment day, in order to provide sedation or anxiolysis for dentistry. If the dosage is determined to be inadequate and an increased dosage is required to sufficiently provide sedation or anxiolysis, the practitioner must reschedule the patient for a subsequent appointment on a different day. All enteral/oral sedatives shall be administered at the same time and only once during any given treatment day unless the administering dentist is permitted to provide intravenous conscious sedation or general anesthesia.
- (5) "Combination inhalation-enteral conscious sedation (combined conscious sedation)" - conscious sedation using enteral agents, as indicated in paragraph (B)(4) of rule 4715-3-01 of the Administrative Code, and nitrous oxide/oxygen inhalation sedation. Nitrous oxide/oxygen used in combination with sedative agents may produce conscious or deep sedation or general anesthesia.
- (6) "Conscious sedation" - a minimally depressed level of consciousness that retains the patient's ability to independently and continuously maintain an airway and respond appropriately to physical stimulation or verbal command, and that is produced by a pharmacologic or non-pharmacologic method, or a combination thereof. In accord with this particular definition, the drugs and/or techniques used should carry a margin of safety wide enough to render unintended loss of consciousness unlikely. Further, patients whose only response is reflex withdrawal from repeated painful stimuli would not be considered to be in a state of conscious sedation.
- (7) "Continual" - repeated regularly and frequently in a steady succession.
- (8) "Continuous" - prolonged without any interruption at any time.
- (9) "Deep sedation" - an induced state of depressed consciousness, accompanied by partial loss of protective reflexes, including the inability to continually maintain an airway independently and/or to respond purposefully to physical stimulation or verbal command, and is produced by a pharmacologic or non-pharmacologic method, or combination thereof.

- (10) "Enteral" - any technique of administration in which the agent is absorbed through the gastrointestinal (GI) tract or oral mucosa [i.e., oral, rectal, sublingual].
 - (11) "General anesthesia" - an induced state of unconsciousness accompanied by partial or complete loss of protective reflexes, including the inability to continually maintain an airway independently and respond purposefully to physical stimulation or verbal command, and is produced by a pharmacologic or non-pharmacologic method, or combination thereof.
 - (12) "Immediately available" - on site in the facility and available for immediate use.
 - (13) "Inhalation" - a technique of administration in which a gaseous or volatile agent is introduced into the pulmonary tree and whose primary effect is due to absorption through the pulmonary bed.
 - (14) "Local anesthesia" - the elimination of sensation, especially pain, in one part of the body by regional injection of a drug.
 - (15) "Minimal sedation" - a minimally depressed level of consciousness, produced by a pharmacological method, that retains the patient's ability to independently and continuously maintain an airway and respond normally to tactile stimulation and verbal command. Although cognitive function and coordination may be modestly impaired, ventilatory and cardiovascular functions are unaffected.
 - (16) "Moderate sedation" - a drug-induced depression of consciousness during which patients respond purposefully to verbal commands, either alone or accompanied by light tactile stimulation. No interventions are required to maintain a patent airway, and spontaneous ventilation is adequate. Cardiovascular function is usually maintained.
 - (17) "Parenteral" - a technique of administration in which the drug bypasses the gastrointestinal (GI) tract [i.e., intramuscular (IM), intravenous (IV), intranasal (IN), submucosal (SM), subcutaneous (SC), intraocular (IO)].
 - (18) "Time-oriented anesthesia record" - documentation at appropriate intervals of drugs, doses and physiologic data obtained during patient monitoring.
 - (19) "Topical anesthesia" - the elimination of sensation, especially pain, in one part of the body by skin or mucous membrane surface application of a drug.
 - (20) "Transdermal/transmucosal" - a technique of administration in which the drug is administered by patch or iontophoresis.
- (C) Prescribing terms
- (1) "Acute pain" - pain that normally fades with healing, is related to tissue damage or trauma, significantly alters a patient's typical function and is expected to be time limited.

The board shall renew the permit unless the permit holder is informed in writing that a reevaluation, as described in paragraph (C) of this rule, of his or her facility(s) and/or methods, is to be required. Such quality assurance audit(s), may include, but are not limited to, a review of documentation of pre-anesthetic evaluation(s), anesthetic and recovery records, and documentation of appropriateness for discharge. 4715-6-02 Prescribing opioid analgesics for acute pain.

- (A) For the treatment of acute pain, the dentist shall comply with the following:
- (1) Extended-release or long-acting opioid analgesics shall not be prescribed for treatment of acute pain;

- (2) Before prescribing an opioid analgesic, the dentist shall first consider non-opioid treatment options. If opioid analgesics are required as determined by a patient history and clinical examination, the dentist shall prescribe for the minimum quantity and potency needed to treat the expected duration of pain, with a presumption that a three-day supply or less is frequently sufficient and that limiting the duration of opioid use to the necessary period will decrease the likelihood of subsequent chronic use or dependence.
- (3) In all circumstances where opioid analgesics are prescribed for acute pain:
- (a) Except as provided in paragraph (B) of this rule, the first opioid analgesic prescription for the treatment of an episode of acute pain shall be:
 - (i) For adults, not more than a seven-day supply with no refills;
 - (ii) For minors, not more than a five-day supply with no refills. A dentist shall comply with section 3719.061 of the Revised Code, including but not limited to obtaining the parent or guardian's written consent prior to prescribing an opioid analgesic to a minor;
 - (iii) The seven-day limit for adults and five-day limit for minors may be exceeded for pain that is expected to persist for longer than seven days based on the pathology causing the pain. In this circumstance, the reason that the limits are being exceeded and the reason that a non-opioid medication was not appropriate to treat the patient's conditions shall be documented in the patient's record; the number of days of the prescription shall not exceed the amount required to treat the expected duration of the pain as noted in paragraph (A)(2) of this rule; and
 - (iv) If a patient is allergic to or otherwise unable to tolerate the initial prescribed opioid medication, a prescription for a different, appropriate opioid may be issued at any time during the initial seven or five-day dosing period and shall be subject to all other provisions of this rule. The allergy and/or intolerance shall be documented in the patient's record. The patient or the minor patients, parent, guardian or other responsible adult must be provided education of the safe disposal of the unused medication.
 - (b) The patient, or a minor's parent or guardian, shall be advised of the benefits and risks of the opioid analgesic, including the potential for addiction, and the advice shall be documented in the patient's record; and
 - (c) The total morphine equivalent dose (MED) of a prescription for opioid analgesics for treatment of acute pain shall not exceed an average of thirty MED per day, except when all of the following apply:
 - (i) The patient has significant and prolonged acute pain related to one of the following conditions:
 - (a) Traumatic oro-facial tissue injury with major mandibular/ maxillary surgical procedures;
 - (b) Severe cellulitis of facial planes; or
 - (c) Severely impacted teeth with facial space infection necessitating surgical management.
 - (ii) The dentist determines that, for the seventy-two hour period following the procedure, it is absolutely necessary to exceed the 30 MED daily limit based on the patient's needs but may not exceed ninety MED per day.
 - (iii) The dentist has documented the reason for exceeding the thirty MED average in the patient record and why it is the lowest dose consistent with the patient's medical condition.
 - (iv) In circumstances when the thirty MED average is exceeded, the dose shall not exceed the dose required to treat the severity for the pain as noted in paragraph (A)(2) of this rule and furthermore, the dose will not exceed ninety MED per day within the initial seventy-two hour period as noted in paragraph (c)(ii) of this rule.
 - (d) Prescriptions which exceed the five or seven day supply or thirty MED average daily dose are subject to additional review by the board.
 - (e) All prescriptions for opioid analgesics for the treatment of acute pain shall comply with rules 4729-5-13 and 4729-5-30 of the Administrative Code and all other federal and state controlled substance laws, rules and regulations.
- (B) The requirements of paragraph (A) of this rule apply to treatment of acute pain, and do not apply when an opioid analgesic is prescribed:
- (1) To an individual who is a hospice patient or in a hospice care program;
 - (2) To an individual receiving palliative care;

- (3) To an individual who has been diagnosed with a terminal condition;
 - (4) To an individual who has cancer or another condition associated with the individual's cancer or history of cancer; or
 - (5) To an individual undergoing medication-assisted treatment for a substance use disorder.
- (C) This rule does not apply to prescriptions for opioid analgesics for the treatment of opioid addiction utilizing a schedule III, IV or V controlled substance narcotic that is approved by the federal drug administration for opioid detoxification or maintenance treatment.
- (D) This rule does not apply to inpatient prescriptions as defined in rule 4729-17-01 of the Administrative Code.

- (N) If any provision of the rules in this chapter is held or if the application of any provision of the rules in this chapter to any person or circumstance is held invalid, the invalidity does not affect any other provision of the rules in this chapter, or the application of any other provision of the rules in this chapter, that can be given effect without the invalid provision or application, and, to this end, the provisions of the rules in this chapter are hereby declared severable.

4715-19-02 Procedures for accessing personal information.

- (A) Personal information systems of the board are managed on a "need-to-know" basis whereby the information owner determines the level of access required for an employee of the board to fulfill his or her job duties. The determination of access to confidential personal information shall be approved by the employee's supervisor and the information owner prior to providing the employee with access to confidential personal information within a personal information system. The board shall establish procedures for determining a revision to an employee's access to confidential personal information upon a change to that employee's job duties including, but not limited to, transfer or termination. Whenever an employee's job duties no longer require access to confidential personal information in a personal information system, the employee's access to confidential personal information shall be removed.
- (B) Upon the signed written request of any individual for a list of confidential personal information about the individual maintained by the board, the board shall do all of the following:

However, the board shall delay notification for a period of time necessary to ensure that the notification would neither delay or impede an investigation of the circumstances and involvement of an employee surrounding the invalid access, nor jeopardize homeland or national security. Additionally, the board may delay the notification consistent with any measures necessary to determine the scope of the invalid access, including which individuals' confidential personal information invalidly was accessed, and to restore the reasonable integrity of the system. Once the board determines that notification would not delay or impede an investigation, the board shall disclose the access to confidential personal information made for an invalid reason to the person. Notification provided by the board shall inform the person of the type of confidential personal information accessed and the date(s) of the invalid access, and may be made by any method reasonably designed to accurately inform the person of the invalid access, including written, electronic, or telephone notice.
